Check for compatible PC Apps or Alternatives Or follow the guide below to use on PC:Select your PC version: If you want to install and use the EV3 Programmer app on your PC or Mac, you will need to download and install a Desktop App emulator for your computer. We have worked diligently to help you understand how to use this app for your computer in 4 simple steps below: Ok. First things first. If you want to use the application on your computer, first visit the Mac store or Windows AppStore and search for either the Bluestacks app or the Nox App >> . Most of the tutorials on the web recommends the Bluestacks app and I might be tempted to recommend it too, because you are more likely to easily find solutions online if you have trouble using the Bluestacks application on your computer. You can download the Bluestacks Pc or Mac software Here >> . Step 2: Install the emulator on your PC or Mac Now that you have downloaded the emulator of your choice, go to the Downloads folder on your computer to locate the emulator or Bluestacks application. Once you have found it, click it to install the application or exe on your PC or Mac computer. Now click Next to accept the license agreement. Follow the on screen directives in order to install the application properly. If you do the above correctly, the Emulator app will be successfully installed. Step 3: for PC - Windows 7/8 / 8.1 / 10 / 11 Now, open the Emulator application you have installed and look for its search bar. Once you found it, type EV3 Programmer in the search bar and press Search. Click on EV3 Programmerapplication icon. A window of EV3 Programmer on the Play Store or the app store will open and it will display the Store in your emulator application. Now, press the Install button and like on an iPhone or Android device, your application will start downloading. Now we are all done. You will see an icon called "All Apps". Click on it and it will take you to a page containing all your installed applications. You should see the icon. Click on it and start using the application. Step 4: for Mac OS Hi. Mac user! The steps to use EV3 Programmer for Mac are exactly like the ones for Windows OS above. All you need to do is install the Nox Application Emulator or Bluestack on your Macintosh. The links are provided in step one Need help or Can't find what you need? Top Pcmac Reviews Good but By BlueShark100 (Pcmac user) This program is great but need a couple of fixes like when you connect the programming blocks with wires the texture for the block goes all weird as well when playing the program from the device the block don’t go wired that bad but they do change. And if there was a way to acces files from the brick and put then your iPad that would be great. Like crontolling the files that exist on the brick (delete) (transfer to device) (organize) so on and so forth. Needs the rest of the blocks I’ll give it five stars once it gets the rest of the blocks Every thing is not there but still easy to use By mad_gammer (Pcmac user) I’ve used this app many times before in competitions and to mess around with. This allows you to program any repeatable scenarios with the simple and fun programming app. I really liked this app when I first used it on someone else’s tablet and I decided to get the app for my self and I plan to use it as my first or secondary use of programming. Very good app By marwantaki (Pcmac user) I was studying for my final or last exams before finishing the year it’s good quality and helped me pass the test because we are not allowed laptops in school I’m 6th grade it’s very similar to pc if you are in school and you don’t have a laptop use this
